## Creditreform Balance Sheet Compact Analysis (Plus)

#### Contents

#### Company identification

Registered company name, company status, trading name, addresses, communication details with email and web address, identification numbers, industry designation.

#### Balance sheet solvency

Details of the balance sheet solvency class and probability of default (POD) with appropriate explanations, presentation of the change in balance sheet solvency over a maximum of five years and the change in solvency of the overall industry.

#### Analysis of balance sheet KPIs

Up to five years' comparison of the company's asset, financial and earnings situation relative to the overall industry.

#### Balance sheet data

Structured, detailed balance sheet information with comments on any deficits not covered by the company's equity capital, P&L for companies not obliged to publish their financial results (for Balance Sheet Compact Analysis Plus).

#### Industry risk

Explanation of the probability of default of the overall industry, broken down by regional state, based on the Creditreform Risk Indicator (CRI).

#### **Balance Sheet Compact Analysis**

The Balance Sheet Compact Analysis provides you with detailed, cogent information on companies and their financial results. Their balance sheets serve as the basis for the data. The most important KPIs contained are: level of indebtedness, equity ratio, liquid funds quota, investment intensity, success quota, 1st degree liquidity.

#### Balance Sheet Compact Analysis Plus

The profit and loss statement of the requested company is provided in addition to the balance sheet information. The most important KPIs contained are: equity ratio, capital commitments, overall capital profitability, supplier payment period, capital turnover, return on sales.

#### Accessing Balance Sheet Compact Analysis (Plus)

You can access the Balance Sheet Compact Analysis (Plus) directly from the Commercial Report or Creditreform standard applications, or we can send you the analysis data in your company's preferred data format. This allows you to optimize your business processes by integrating the data directly into your systems.

#### Further information

If you need even more information, the Creditreform Balance Sheet Premium Analysis could be the answer. It contains detailed information on balance sheet solvency in 19 rating classes, spot-on probabilities of default (for one and five years), a meaningful, traffic light color-coded sector analysis and a cashflow statement.

#### Summary of benefits at a glance

- Access to exclusive, unpublished balance sheet data and profit and loss statements
- Excellent availability through leading database with almost one million companies' balance sheets
- Substantiated situational stock-take through SWOT analysis
- Structured, graphically prepared, ergonomic presentation
- Audit proof assessment process and mapping to transparent IFD scale – saves time and provides business process support
- Discriminating consideration of all mainstream accounting standards (HGB, IFRS, US-GAAP)
